

Errata
February 24, 2011

The following changes have been made to the final report, which was re-posted with these changes on February 24, 2011.

- 1) In the Appendix on Asthma (page CDPH-45), the rate for asthma-related emergency room visits was misstated as 2.3 per 10,000 residents; it should be 35.7. Rates reported for Avenal rate (26.3), Kings County (61.5), and California (43.6) are correct.
- 2) The Table of Contents has been updated to reflect the addition in Part 1 of the report by the California Department of Public Health of two appendices which were added in response to comments ("Biomonitoring" and "Outcomes Other than Birth Defects"). The Final Report contained these appendices, but the Table of Contents had not been updated to reflect them.
